

THE EARTH FORUM OF HOWARD COUNTY

Tenth Anniversary Season
A Decade of Listening, Learning and Acting

presents

MAKING A BETTER FUTURE IN THE AGE OF HUMANS

We need to start talking about what kind of planet we want to live on.

With Erle C. Ellis

Professor of Geography and Environmental Systems
at the University of Maryland, Baltimore County
Dr. Ellis is the author of “Anthropocene: A Very Short Introduction.”
He studies the ecology of human landscapes and
their global changes in the age of humans, the Anthropocene.

SUNDAY, NOVEMBER 18, 2018 | 2:00 P.M.

No one wants the hotter, more polluted and less biodiverse planet we are now making in the Anthropocene, the age of humans. Yet no natural or technological limit ultimately prevents us from creating a better future. When we work together, across our social and cultural divides, we humans are a force of nature. It's time to start talking about the better future we want, and less about the future we don't. The planet we make will reflect the people we are.

The Earth Forum is open to all interested persons, is free.
Childcare is provided for infants and toddlers—call 410-730-3545 for more information.
